"Less is more: the elegance of minimalist lighting with a light fixture featuring essential design!"

PILL, our innovative line of lamps, designed to blend harmoniously with modern interiors through a minimalist design and refined lighting.

Engineered for installation in drywall, both on walls and ceilings, PILL lamps offer a versatile and aesthetically flawless lighting solution for any setting.

Characterized by a square shape that emits a uniform and diffuse light, these lamps are available in three practical sizes: 50,8 x 50,8 mm (2x2 IN) , 76,2 x 76,2 mm (3x3 IN) , and 101,6 x 101,6 mm (4x4 IN) , allowing for perfect integration into any type of space.

PILL collection also offers two installation options: flush, for a seamless look that completely merges with the surface, or recessed, creating a subtle interplay of depth and texture.

With its non-glare light, PILL is designed to create a welcoming and comfortable atmosphere, reducing visual fatigue and improving the well-being of occupants. Its clean and minimalist design, combined with quality lighting, enriches the architecture of spaces without visually overloading them, offering a lighting solution that is as functional as it is elegant.

PILL line not only excels in design and functionality but also offers a wide range of lighting options. Available in various Kelvin ratings, as well as tunable white, RGB, RGBW, and DIM to WARM versions, this collection allows for customizing the environment with the desired lighting atmosphere, adapting to different times of the day and various needs.

Ideal for those seeking a lighting solution that combines modern aesthetics and exceptional performance, PILL is the perfect choice for transforming any space into a welcoming environment, with a touch of sophisticated simplicity.
